Completeness and transferability: the URLs of the related homepages are in the supplement. (refer to as txt.-file webpages incl data collection)

Effectiveness & efficiency

Effectively every patent document comprising the CPC sections of A Human necessities, C chemistry; metallurgy and G Physics will be disclosed through the offered collection, vice versa a chance to invent with the offered data will foster innovation, competitiveness and economic growth within the assigned country code. With the advantage of the European Patent Treaty, an increase in a smoother and cheaper process in priority documents is ensured with a challenging even higher levels of quality as commitment to excellence through the highly skilled staff.

Design & usability

The design protection is based on intellectual property rights, in fact Copyright due to authors claimed priority at the 11th April 2024 at a database with the filing of MedLog2024.org, the offer of the disclosed solution will comprehend of a database consisting of additional informational content to further enhance the innovation potential within diverse technical fields.

Creativity & Innovation

Mainly the concept of the EPO database is transferred onto scientific literature – instead of splitting (patent) information onto the different patent offices in a worldwide context, the EPO offers next to the aimed registration of european patent documents patent documents from the other continents, such as Latin America, North America, Africa, ect. with the chance to gain competitive edge on economic growth within diverse technical fields.
In such, the offered solutions comprises of a merge of the splitted different platforms as described and contrary offers a database for further accelerating innovation competencies within diverse technical fields.
